*Figure based on NEDC (New European Driving Cycle) static laboratory combined average city and highway cycle test mandated by ADR 81/02. Range figure are laboratory test results only based on standardised testing conditions which measure, energy consumption and range. Actual real world range results will likely be less and to the extent that they are less will depend on a combination of factors including but not limited to load, traffic conditions, driving style, type of journey, vehicle configuration, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions. It is for comparison purposes only and not intended to be give an accurate indication of what might be achieved in the real world.

Disclaimer: Safety technologies may not operate optimally under all driving conditions, operation and effectiveness depends on many factors. Driver is responsible for safe and attentive driving. Safety technologies are not a substitute for the driver's control over the vehicle. See owner's manual for complete details. Payload and tare weight figures are based on vehicle certification. It is the driver's responsibility to ensure: weight of fully loaded vehicles do not exceed GVM; front and rear axle load limits are not individually exceeded; the combined weight of the fully loaded vehicle (including tow ball download when towing) and trailer does not exceed the GCM; compliance to New Zealand towing regulations. Payload is the combined value of occupants, luggage, cargo, added options, accessories and tow ball download (when towing). Tare weight includes the vehicle with 10 litres of fuel and all standard equipment excluding occupants. Additional weights of optional features, occupants, luggage, cargo, accessories and tow ball download (when towing) must be taken into account when calculating payload and tare weight. When a genuine tow bar with wiring is fitted, and trailer is attached, parking sensors will be disabled.

*The warranty is for a period of 7 years or 200,000kms / 160,000kms for EVs (whichever comes first), from the date of first registration, provided that the vehicle is serviced as per the maintenance schedule set out in the Service & Warranty Booklet. It covers manufacturing defects caused by factors such as design, assembly, and raw materials of the covered parts along with all-inclusive roadside assistance. It excludes routine maintenance, wear-and-tear items, and damage caused by misuse, accidents, or unauthorised repairs. Warranty claims require proof of purchase and service records. This warranty complies with local laws and does not affect your statutory rights. This is valid on all vehicles registered on or after 1 December 2024. For full details, visit <https://ldv.co.nz/warranty/>.

ALL RIGHTS RESERVED. LDV New Zealand reserves the right to vary vehicle specifications and standard features in New Zealand from those detailed in this brochure. Vehicles shown in this brochure may be fitted with accessories or may feature equipment that is not available in New Zealand-spec models. Please check with your local authorised LDV Dealership.
